Change Log

Version number	Description
V1.8.0.0	Initial released version
V1.12.0.0	Added nl-BE translations to the app.
V1.14.0.0	Rebranding of app.
V1.16.0.0	Renamed to "Inventory Availability Indicators" Updated documentation Fixed a bug that caused the shown availability indicators to be based on the quantity of the previous version of a record (i.e., and only after a refresh show the up-to-date availability indicator) Only show an indicator for lines with inventoriable items Fixed the conditions for red/orange availability indicators Fixed indicators on assembly and transfer lines only being loaded after a page refresh (now they will be refreshed after leaving the record) Implemented option to start a subscription for the app
